

JIM AND THE DIETARY STAFF

In the Dietary Department we have two new ladies; they are Erica Varay & Brittney Reichard. Erica is an evening cook, and Brittney is dining room aide and dish washer.

We have a new juice machine in the Heights dining room, and a new one is ordered and coming soon for the Manor dining room. Also regarding some old news; we did get the cappuccino machines and they are up and running.

We still encourage that if you or your loved ones have any ideas for a special meal for an upcoming potluck or a birthday dinner, please feel free to call or stop by.

**Thank You,
The Dietary Staff**

BILLIE HAYES AND THE ENVIRONMENTAL SERVICES DEPARTMENT

The scoop from Environmental Services,

With the hope that winter is almost over we are finishing up our inside work. We have remodeled the med. rooms and fixed up some of the empty resident rooms. We have taken all the old sink and vanity units out and replaced them with pedestal sinks-this makes it really easy for those who want to reach the sink and wash their hands ect.

As soon as the weather gets nice enough we will be putting the last 12 windows in that we weren't able to finish last fall. Most of them will be going in the west wing. We are still going to do some more landscaping in the yard once the weather gets better.

In our spare time we are working to get the roof replaced on the Manor and new soffit, fascia, and gutter installed.

In our laundry department we have some clothes that have not been marked and we do not know who they belong to. If you have some missing, please let us know or stop and see our unclaimed clothing section.

If you have concerns or questions please let us know.
